EPS thermocol boxes are an innovative solution for packaging and insulation needs. Lightweight and versatile, they guarantee safe transport for your products and keep them at the right temperature. Explore the catalog to find the right one for you.

By Sanmati Enterprises

Size and Dimensions

Small Boxes

- Perfect for smaller items like medicine, cosmetics, and food for one person.
- Dimensions range from 140x80x102 mm to 330x220x140 mm.
- Weights vary between 50 grams and 180 grams.

Medium Boxes

- Great for larger food portions, electronics, and fragile items.
- Dimensions range from 306x370x180 mm to 715x450x385 mm.
- Weights range from 200 grams to 1 kgs.

Large Boxes

- Ideal for bigger products like industrial equipment or furniture.
- Dimensions range from 685x395x320 to 710x445x390 mm.
- Weights can go over 10 kg depending on the size and density.

Weight and Volume

Maximal Volume

Despite their low weight, EPS thermocol boxes can hold an impressive amount of volume. Our largest boxes offer up to 1 cubic meter of space for your products.

1

Minimal Weight

Our lightest EPS thermocol box weighs only 50g, making it easy to handle and transport. Even larger boxes remain surprisingly light.

2

Optimal Balance

Choosing the right EPS thermocol box means finding the perfect balance between weight and volume. Our catalog provides detailed information to help you choose wisely.

Insulation Properties

Cooling Efficiency

EPS thermocol boxes have outstanding insulation capabilities, keeping the contents safe and fresh for long periods of time. The boxes maintain a cold temperature for up to 72 hours.

Heating Efficiency

EPS thermocol boxes can also provide optimal insulation for heated products, keeping them warm for up to 12 hours.

Maintaining Temperature

These boxes are the perfect solution for shipping temperature-sensitive goods such as vaccines, wine, or flowers.
